Professional Introduction

Dear Hiring Manager,

Thank you for taking the time to review my GIS portfolio. I am a GIS professional with more than seven years of experience supporting utility operations through accurate mapping, spatial data management, and geospatial analysis. My background has allowed me to develop strong technical skills while gaining a practical understanding of how high-quality GIS data supports safe, efficient, and reliable infrastructure management.

Throughout my career, I have maintained and updated utility GIS records, performed quality assurance and quality control on spatial and attribute data, integrated engineering and field documentation, and created maps and graphics that support engineering, operations, and field personnel. I have experience with ArcGIS Pro, LocusView Gen 2 and Gen 3, Smallworld GDO, geodatabase editing, and utility asset mapping.

I take pride in producing accurate, dependable GIS data and enjoy solving spatial problems through careful analysis and collaboration. In addition to my professional experience, I am pursuing a GIS Certificate in Geospatial Information Science through Collin College, where I have expanded my knowledge of cartography, spatial analysis, geoprocessing, and map design. The projects included in this portfolio demonstrate my technical abilities, attention to detail, and commitment to continuous learning.

I am seeking opportunities where I can contribute my GIS experience, strong work ethic, and passion for geospatial technology while continuing to grow professionally. Thank you for reviewing my portfolio. I appreciate your time and consideration and welcome the opportunity to discuss how my skills can benefit your organization.

Sincerely,

Kennadie R. Neal
