

Kennadie R. Neal

Terrell, TX | 214-674-4750 | kennadiehigginbotham@yahoo.com

PROFESSIONAL SUMMARY

Senior GIS Specialist with 7+ years of experience supporting natural gas utility infrastructure, enterprise GIS data maintenance, underground asset mapping, and geospatial QA/QC. Skilled in ArcGIS Pro, LocusView Gen 2/3, Smallworld GDO, geodatabase editing, utility facility records, engineering/field documentation review, and map production. Experienced collaborating with engineering, technical services, field operations, and damage prevention teams to maintain accurate GIS records that support safe excavation, reliable utility operations, and data integrity. Currently pursuing a GIS Certificate in Geospatial Information Science.

CORE GIS AND UTILITY SKILLS

- ArcGIS Pro / Esri GIS workflows
- Enterprise GIS data maintenance
- Geodatabase editing and feature class management
- Facility records and utility asset mapping
- Spatial data QA/QC and validation
- Map creation, updates, and cartographic products
- Engineering drawings and field documentation
- Pipeline, service line, meter, and regulator data updates
- Damage prevention and safe excavation support
- LocusView Gen 2/3 and Smallworld GDO
- Microsoft Excel, Word, and Outlook
- Training support, workflow improvement, and data standards

PROFESSIONAL EXPERIENCE

Senior GIS Specialist - Atmos Energy | Forney, TX *Apr 2025 - Present*

- Maintain and update GIS data for natural gas distribution facilities, including underground mains, service lines, meters, regulators, and related asset records.
- Perform detailed QA/QC on spatial and attribute data to ensure GIS records are accurate, consistent, and reliable for engineering and field operations.
- Integrate engineering designs, as-built information, work orders, field sketches, and LocusView updates into GIS systems and enterprise facility records.
- Create, review, and update maps and graphics used by operations, technical services, field personnel, and internal stakeholders.
- Support safe excavation and damage prevention by maintaining accurate underground utility data and responding to mapping/data questions from field teams.
- Assist with GIS workflow improvements, data standards, troubleshooting, and training support for GIS personnel.

GIS Specialist - Atmos Energy | Forney, TX *Oct 2023 - Apr 2025*

- Maintained GIS databases supporting natural gas infrastructure, system operations, engineering projects, and field activities.
- Updated pipeline and service line data based on engineering documentation, construction updates, and field-collected information.
- Verified spatial accuracy and attribute completeness to support reliable utility mapping, safe excavation, and operational decision-making.
- Used ArcGIS Pro, LocusView, and related GIS tools to edit asset data, resolve discrepancies, and maintain accurate facility records.

GIS Specialist (Contractor) - Matrix Resources assigned to Atmos Energy *2017 - Oct 2023*

- Maintained and updated underground utility asset records using Smallworld GDO and utility mapping workflows.
- Supported GIS data accuracy, record consistency, and field operations by reviewing and updating facility information.
- Developed strong knowledge of natural gas distribution records, mapping standards, and utility infrastructure data.

EDUCATION

Collin College - GIS Certificate, Geospatial Information Science (In Progress) | Relevant coursework: ArcGIS Pro, geospatial analysis, cartography, spatial data management, ModelBuilder, map layouts, and GIS project packaging.

Forney High School - High School Diploma | GPA 3.8

SOFTWARE

ArcGIS Pro | Esri GIS | LocusView Gen 2 & Gen 3 | Smallworld GDO | Geodatabase Editing | Microsoft Excel | Microsoft Word | Microsoft Outlook
