Hiring Manager
Atmos Energy
Dallas, TX

Dear Hiring Manager,

I am excited to submit my resume for the GIS Specialist / GIS Analyst position with Atmos Energy. As a current Senior GIS Specialist with more than seven years of utility GIS experience supporting Atmos Energy natural gas distribution systems, I have developed a strong understanding of the importance of accurate facility records, data integrity, and dependable GIS support for safe and efficient utility operations.

In my current role, I maintain and update GIS records for underground natural gas infrastructure, perform QA/QC on spatial and attribute data, integrate engineering and field documentation, and create maps and graphics that support engineering, technical services, operations, and field personnel. My experience with ArcGIS Pro, LocusView Gen 2 and Gen 3, Smallworld GDO, geodatabase editing, and utility asset mapping aligns closely with the needs of this position.

I take pride in producing accurate, reliable GIS data because I understand how directly it supports safe excavation, damage prevention, field response, and long-term system planning. I also enjoy working with others to resolve data issues, improve workflows, and support consistent mapping standards. My background with Atmos Energy gives me a practical understanding of company operations and the responsibility that comes with maintaining natural gas infrastructure records.

I am currently pursuing a GIS Certificate in Geospatial Information Science through Collin College, and I am eager to continue growing my GIS knowledge while contributing to Atmos Energy's commitment to safety, service, and operational excellence. Thank you for your time and consideration. I would appreciate the opportunity to discuss how my experience and skills can support this role.

Sincerely,

Kennadie R. Neal
